ABOUT ACTOU

ACTOU maintains a strong customer-focus and values long-term business relationships with all our customers. These are conducted with integrity, with a company-wide commitment to quick and quality services. We always ensure to be responsive and adaptable to meet our customers' needs.

Association of Cesspool Truck Owners of Uganda Limited is duly incorporated in Uganda as a company limited by guarantee.

The company has its offices at Spring Road, Wankoko Bugolobi next to NWSC treatment plant. Our services are all over Uganda and East Africa at large.

COMPANY OVERVIEW

ACTOU was started, established and fully incorporated in October 2020 under REG NO. 80020000730214 and TIN NO. 1014182896 to promote a healthy and conducive environment to all through the services offered.

Julius Mugabi

DIRECTOR - COMPANY SECRETARY

I take this opportunity to introduce to you the Association of Cesspool Truck Owners of Uganda Limited- ACTOU, a company initiated by sewage truck owners in Uganda to professionally deal with online and onsite collection, transportation and disposal of fecal or sewage matter from homes, institutions, companies in Uganda and the East African community. Trust us and you will never regret.

MISSION

To pursue the right to a healthy environment for all Ugandans while enhancing the livelihoods of all Ugandans through service provision, training and empowerment.

VISION

To create a healthy environment, enhance sanitation and drainage hygiene in Kampala suburbs and beyond through provision of cesspool services, training of households and funding activities geared forward ensuring cesspool sanitation and drainage hygiene is enhanced.

OUR SERVICES

All our services are aimed at ensuring safe waste water or sewage, fresh water, domestic and industrial solid waste(kasasiro) collection, transportation and disposal as per recommended standards. Experience and knowledge of water & waste management allow us to continually improve and adapt our services to ensure client satisfaction. We aim to exceed the expectations of every client by offering outstanding customer care service and building sustainable relations, thus optimizing and improving operation efficiency.

Provision of Cesspool Services at subsidized Prices

We have experience in both residential and commercial waste systems.

A great number of slum communities, homes, hotels, industries and other institutions have satisfactorily benefited from our onsite and online sewer and waste collections done on immediate responses to their calls thereby keeping our people healthy and safe.

In order to achieve sustainable and trouble-free sewer and toilet systems, they should be constructed, used and hygenically drained and serviced before showing signs of failure.

We do understand that sewage and solid waste management emergencies occur at any times and need immediate attention and responses, with our experienced team, we work around your busy schedule and immediate need so that we can deliver quick and quality services.

2

Sensitization on construction of toilets and latrines

The disposal of human waste is one of the challenges facing any growing population leading to an increased spread of a number of diseases like diarrhoea, typhoid, cholera and dysentery.

We've therefore at all times engaged our clients and communities through seminars and studies on consultations, construction, maintenance and proper usage of economical environmental friendly, durable and renewable septic tanks, toilet and

3

Training of youth on drainage and sanitation hygiene

Lately in Uganda and East Africa at large, there has been a rapid growth of populations especially the youths who are majorly situated in urban settings which are characterized by several problems of poor solid waste, improper excreta and waste water management, unequipped drainage, and inadequate personal and general hygiene standards. As a result, these places have become bleeding grounds for diseases, making the search for solutions to improve health

in such communities an utmost urgency.

We therefore engage the young generation through capacity building to have safe and health environments including adequate hygiene and sanitation facilities that allow communities to be healthier. These proactive and sustainable interventions have the potential to not only improve the lives of communities but also create a lasting impact.

Vehicles, Tools and Manpower

Our team comprises of professional and trained technical staff and leaders who are always ready to offer their services to all clients' requests.

We have built capacity in vehicles, tools and manpower that can handle any amount of solid waste, sewage drainage, fresh water supply and plumbing in Uganda and East Africa at large.

We have a fleet of more than fifteen(15) trucks in capacity volumes of 3,000 - 15,000 litres, ranking us the number one service providers in our field of operation.

4

5

Plumbing and Fresh water supply

When it comes to modern and quality house or institution plumbing, our team of technocrats is always ready and available to ensure ontime and commendable execution of praise-worthy services.

We've also always been reliable where and when fresh water shortage occurs, keeping clients supplied with asmuch as their requests. Our tank capacities vary from 1000 - 10,000 litres.
